Subject Index

Adhesion, 117
Adsorption, 85, 95, 295, 307
Aerodynamic instability, 223
Agglomeration, 137
Aggregate diameter, 73
Aggregates, 185
Alcohols, 203
Alumina, 85
Anatase, 295
Atomic force microscope, 117

Bayer process, 101
Bayer processing, 137
Bending elasticity, 21
Bilayer, 21
Bingham fluid, 193
Birefringence, 35
Block copolymers, 275
Bubble nucleation, 11

Calcium carbonate, 333
Cancrinite, 101
Carboxyfluorescein release, 167
Catalytic dehydration, 211
Cationic polyacrylamide, 307
Chemisorptive fibre, 95
Chitosan suspension, 193
Chlorine evolution, 269
Coal compressibility, 219
Coated particles, 315
Coated titanium anodes, 269
Cobalt(II) compounds on silica, 315
Cobalt silicate, 315
Collapse structures, 11
Conductivity, 203
Contact angle, 1, 235
Corrosion stability, 269
Counter-ions, 95
Critical micelle concentration, 203

Dissolution, 127

DLVO, 117
Double-layer electrostatic, 117
Droplet elastic energy, 35
Droplet polarizability, 35
Dynamics, 21

Elastic modulus, 325
Electrokinetic phenomena, 261
Electrorheological fluid, 193
Ellipsometry, 307
Equilibrium solubility, 101
ER response, 193

Fluorocarbon surfactant, 63
Fractal, 219
Fractal properties, 185
Friction, 21
FT-IRAS, 147

Gibbsite, 85, 137
Glass slides, 333

Hematite, 47
Hole formation, 1
Hydrocarbon surfactant, 63
Hydrophilicity, 235
Hydrophobic forces, 11

Influence of ceramides on the liposome permeability, 167
Interfacial tension, 325
Intermolecular reaction, 211
Ionic strength, 245
Isoelectric point, 245

Kerr effect, 35

Layer thickness, 307
LB-layers, 11
Light scattering, 185
Lipophilic surfactant, 325
